## Rabies Vaccination Application “Jazzy”

Dr. Amit Chaudhari

### What it Jazzy?

Humane Society International has developed a state of the art mobile phone-based application (both Android and iOS) to use in Rabies Vaccination Programs. It is a simple to use yet very effective application developed to meet the needs of a field based program based on years of experience of mass vaccinating dogs. It captures all the required details Rabies Vaccination Programs need to evaluate their impact and create reports for program partners.

### What are the key functions and features of Jazzy?

- Work offline while Vaccination and upload data when you get internet/ Wi-Fi
- Draw your own area boundary for vaccination - Geo Fencing
- Live Monitoring of all vaccinations – when internet is available in the field
- Collect photos of the dog/cat, location, street name and dog/cat details
- Generate several types of required reports
- Conduct post vaccination coverage survey
